Nuclear Pharmacy
Management System

WORLD'S FIRST REAL-TIME NUCLEAR PHARMACY
MANAGEMENT SYSTEM

Software *Solutions*

BioRx is the nuclear pharmacy industry's most technologically advanced management system. Capable of streamlining inventory receipt, processing orders, shipping and invoicing, BioRx provides a comprehensive software solution to efficiently operate your nuclear pharmacy.

PRODUCT FEATURES

- Real-time dispensing documentation complete with precise filled amounts
- Streamlined inventory management
- Accurate billing system, capable of downloading invoices to Quickbooks
- User-friendly interface that includes touch screens enclosed in hoods, high-speed printers and bi-directional communication with dose calibrators
- Reporting capabilities for kit preparation, dispensing, billing, quality control, inventory and shipping
- Integration with barcode scanners inside hoods and at shipping stations to verify correct information input
- Web interface to enhance customer convenience with online ordering, dose status and invoice viewing

BACKUP REDUNDANCIES

BioRx employs three diverse ways of backing up data - RAID hard drive mirroring, redundant database server and off-site backups. With these three options we are confident no facility will ever suffer a data loss.

With BioRx, you will be able to accomplish these items in user-friendly electronic format eliminating the need for endless paperwork.

For additional information, setup a presentation or receive a proposal for the BioTrax Quality Management System (QMS) Software Solution, please contact us at 1-800-851-0025, ext 206

- Dispensing screen connects directly to the dose calibrator to read exact dose drawn values
- Pharmacist mandated controls over lab technicians
- High speed script printing
- Calculate amounts needed to fill specific orders
- Print syringe and Rx labels
- Screen filters for products, runs and customers
- Quick access to elute generator and mix kits screen
- On the fly inventory adjustments

CENTRALIZED TASK LIST

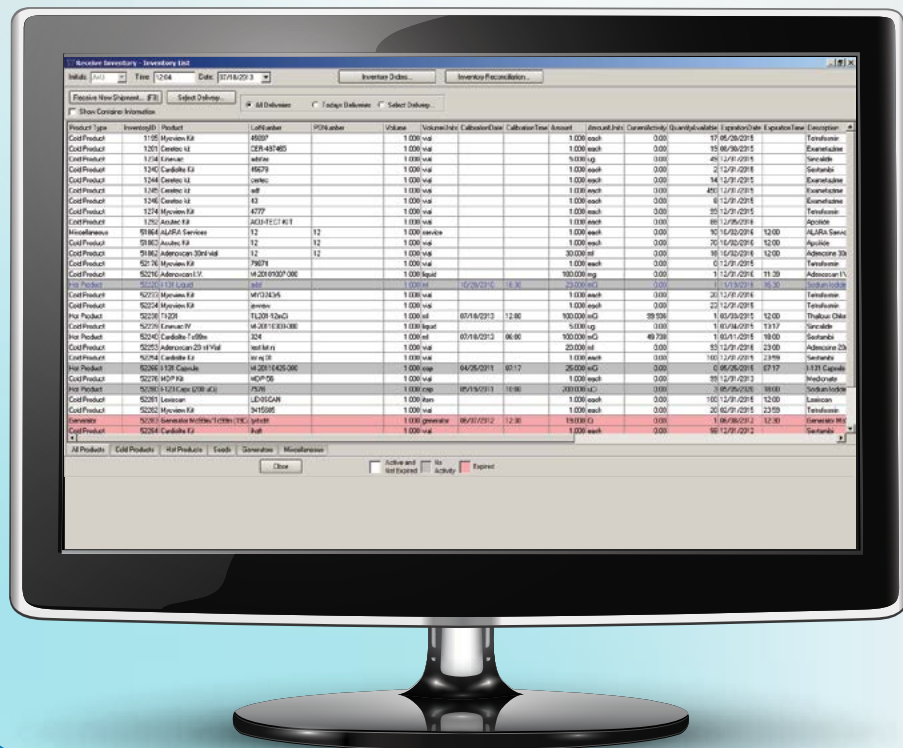

- Contains all required pharmacy tasks
- Dose Calibrator Constancy
- Dose Calibrator Linearity
- Dose Calibrator Accuracy
- Sealed Source Inventory
- Survey Meter Calibrations
- Area Monitoring
- Setup tasks to remind at desired frequency

STREAMLINED INVENTORY MANAGEMENT

Streamlined inventory in a Nuclear Pharmacy. Keep all products in a central area that contains every product available for sell to customers. All tasks associated with inventory can be completed through the inventory module, edit, print labels, and disposal.

- Easily view inventory items on one screen
- Track expired and non-expired products
- Print labels for inventory items on receipt
- Track all incoming wipes and surveys
- Track PO#, Packing List# and all inventory details
- Transfer products between pharmacy locations

ACCURATE BILLING

Billing inside of BioRx is robust and offers you the ability to bill directly from the program. Keep records of all pricing and credits given to each customer. Recall any record at any time.

- Create invoices for all your customers through BioRx
- Keep track of all credits given to specific customers
 - » Allowed credits by client/product
- Price Schedules
 - » Per Unit Dose
 - » Amount by unit of measure
 - » Scaled, a table pricing structure
- Reprint invoices at any time
- Export invoices to Quickbooks
