NMIS Enterprise Edition

MOVE UP TO ENTERPRISE

ec2 Software Solutions is pleased to introduce an Enterprise version of the popular NMIS[®] software. It's perfect for your needs today... powerful enough to accommodate your future growth!

PROTECT DATA

Requirements for data availability have placed a huge burden on IT departments to keep up with the demand. The Enterprise version of NMIS has been developed to meet these demands and protect ePHI data.

CENTRALIZED INSTALLATION

The Enterprise is designed for hospitals or clinics with multiple NMIS locations that want to have the data on a central server where it can be easily managed by the IT department.

ENTERPRISE ADVANTAGES

- Consolidates multiple NMIS installations
- Compatible with VMWare and Citrix
- Saves time and resources with a single-install program
- Minimizes user downtime
- Connects to your own SQL database
- Managers can review data from a central location

Want to know more?

To find out how the NMIS Enterprise can fulfill your ePHI requirements, please contact us at 800-851-0025 or email sales@ec2software.com

400 Apgar Drive, Suite 1, Somerset, NJ 08873
